

# LEE COLLET DIE 222

AN AMAZING  
RELOADING  
DIE!!!!

[www.africanpredator.com](http://www.africanpredator.com)

I load a good couple of calibres, and do a considerable amount of loading for the 222, it is a favourite cartridge of mine and I love to load for it.

I have used the 222 RCBS reloading die set in my 222 for a while, but wanted to get a 222 COLLET DIE for my 222, as I know the Collet die in my 223 gets fantastic results.

And for predator hunting we need a constant performer, you cannot afford to miss, so!!

This die costs \$19 in America; here it's over R467-00!

## THE 222 COLLET DIE and how it works!

What this die does is it allows you to reload brass fired from your rifle, and the brass you eject is reloaded as it came out of your rifle, the walls are untouched, ONLY the neck is resized.

You turn in the die in your press with the lever down, and you turn in the Collet die, then when it touches your shell holder for the 222 you put in, you turn it more one full turn, and tighten that Collet die in place.

Then put in a fired case, and pop out the primer, then a little more pressure will resize that neck to firmly hold the next bullet you reload – simple! Now you got a fire formed case that can only be loaded in your rifle, it now fits your rifle's chamber like a glove.

Here are a few targets I zeroed in at, I load my rifle to shoot 1' inch high at 100m, this way at night all the way out to 270m I aim dead on, and I don't think I will have to shoot that far very often!

### The loads used are;

S321 Powder

23, 5 grains

Primer Small Rifle Magnum Primers

Sierra Varminter #1330 Stock No.

50grains

**Two bullets touching, 120m.**

**222  
S321 / 23,5 grains / Magnum Small primers  
50gr Sierra Varminter #1330  
[www.africanpredator.com](http://www.africanpredator.com)**

***I was informed by my USA buddy, if you send Lee in USA two of your fired cases from your rifle they will make you a die made only for your rifle!  
Cost at \$50.***
