

# FOXPRO DIGITAL PREDATOR CALLS AND PROBLEMS

I have decided to write this as on the internet it has been found that people make comments that are very untrue, and state various things that simply are false.

Here is an insert from a certain website – that an individual claims the following;

.....s stel dit as 'n feit dat alle Foxpro roepers die een of ander tyd oppak en probleme gee.

I would like to put the record straight here and say that I have been involved with Foxpro and its callers for a while now, and personally myself in the last 5 years have never sent any caller back to the states to be fixed that was faulty, I have had in total one person who had a problem with a FX5 remote that was faulty and it was replaced, but sending back any callers NO SIR – NEVER, not me.

It is very unrealistic to claim that ALL callers are faulty and they all pack up, even a Rolls Royce will give trouble, but not all of them.

If you want to order Foxpro callers contact JOE at [joe@gofoxpro.com](mailto:joe@gofoxpro.com) or contact me, the new Fury, Spitfire and Fire fox are now available for 2010.

Trust me, if I was promoting a product and they are all faulty do you think I will put my name and reputation on that make of caller – NO WAYS! In English we have a perfect saying – “ Bullshit baffles brains” and you had better believe it, *because many people are indoctrinated by crap other people spit out.*
